

Certification of House-Pool Protection Device Installation

This document provides for the homeowner to certify that the following protection device has been installed at a particular address.

I certify that the following protection device is installed between all doors leading from the house and garage into the pool area.

All doors leading into the pool area are equipped with an alarm. The alarm sounds continuously for at least thirty (30) seconds – or until the alarm is manually reset (if the door closes within the 30 second period, the alarm continues to sound until the completion of the 30 seconds or until the alarm is manually reset). The alarm is capable of being heard throughout the house during normal household activities. The alarm automatically resets under all conditions.
