

SPRING REMINDERS

New sewer averages are here. Your April bill reflected your new winter sewer average, based on water usage from the cold months. Lower winter use = lower sewer bill. Something to keep in mind for next year.

IRRIGATION

Irrigation systems use more water than you realize, and leaks are not always visible with the naked eye.

Take some time for system maintenance and check the runtime settings on your controller. It could save you \$\$\$.

Conserving water not only helps your monthly expenses, but it helps the environment.

Every drop counts. Use it wisely.

STORM DRAINS

Storm drains are for stormwater only. Dumping anything else - grass clippings, motor oil, paints, and soap - pollutes our creeks and lakes.

Public Works wants to remind you: Only rain in the storm drain.
